

The Pharmacist & Patient-Centered
Diabetes Care

A CERTIFICATE PROGRAM FOR PHARMACISTS

Hosted by: Ohio Pharmacists Association

Wednesday, November 9, 2022 • OPA Office • 2674 Federated Blvd, Columbus, OH

ACTIVITY PREVIEW AND GOAL

APhA's *The Pharmacist and Patient-Centered Diabetes Care Certificate Training Program* is an educational experience designed to equip pharmacists with the knowledge, skills, and confidence needed to provide effective, evidence-based diabetes care. The program provides comprehensive instruction in current diabetes concepts and standards of care and incorporates case studies and hands-on skills training focused on the situations most likely to be encountered — as well as the services most needed — in community and ambulatory care practice settings. Participants will gain experience evaluating and adjusting drug therapy regimens for patients with type 1 and type 2 diabetes, counseling patients about lifestyle interventions, analyzing and interpreting self-monitoring of blood glucose results, and assessing the overall health status of patients to identify needed monitoring and interventions.

KEY SEMINAR LEARNING OBJECTIVES

- Evaluate the overall health status of patients with diabetes in terms of recommended monitoring and interventions, and formulate strategies for closing gaps in care.
- Propose modifications to a patient's drug therapy regimen rooted in evidence-based algorithms for diabetes management.
- Recommend dietary interventions to support optimal glycemic control and weight loss (when indicated) in patients with diabetes.
- Analyze and interpret a patient's self-monitoring of blood glucose results and use the results to identify needed changes in the diabetes management plan.
- Demonstrate proper technique for measuring blood pressure, administering injections, obtaining finger-stick samples for blood glucose monitoring, operating blood glucose meters, and performing monofilament foot testing.
- Integrate the varied aspects of comprehensive diabetes care into efficient, sensitive, respectful pharmacist-patient interactions that support optimal patient self-management.
- Describe ways in which pharmacists can keep abreast of new developments and take advantage of professional opportunities in diabetes care.

For a complete list of learning objectives and for all APhA accreditation information and policies, please visit APhA's website, <https://www.pharmacist.com/Education/Certificate-Training-Programs/Diabetes-Care>.
