

# Artificial Intelligence in Community Pharmacy Practice

Olivia Kinney, PharmD, MS

Clinical Program Development Manager

Kroger Health

OPA Annual Conference & Trade Show  
April 5-7, 2024

## Disclosure Statement

Olivia Kinney has no relevant financial relationship(s) with ineligible companies to disclose.

*and*

None of the planners for this activity have relevant financial relationships with ineligible companies to disclose.

# Learning Objectives

At completion of this activity, participants will be able to:

1. Define artificial intelligence and its origin;
2. Identify best practices for responsible use of artificial intelligence;
3. Discuss barriers to artificial intelligence implementation in pharmacy practice; and
4. Discuss use cases for artificial intelligence in pharmacy practice

# The Buzz Around AI

Ohio Pharmacists Association

The future  
of healthcare  
is **personalized**,  
not **generalized**.

**Bloomberg**

**Generative AI to Become a  
\$1.3 Trillion Market by 2032,  
Research Finds**

**Kroger CIO Discusses Digital  
Innovation Trends for  
Grocery Retail in 2024**

**AI, ChatGPT use  
in medicine can  
help or hurt  
patients**

**Amazon spends  
\$2.75 billion on  
AI startup  
Anthropic in its  
largest venture  
investment yet**

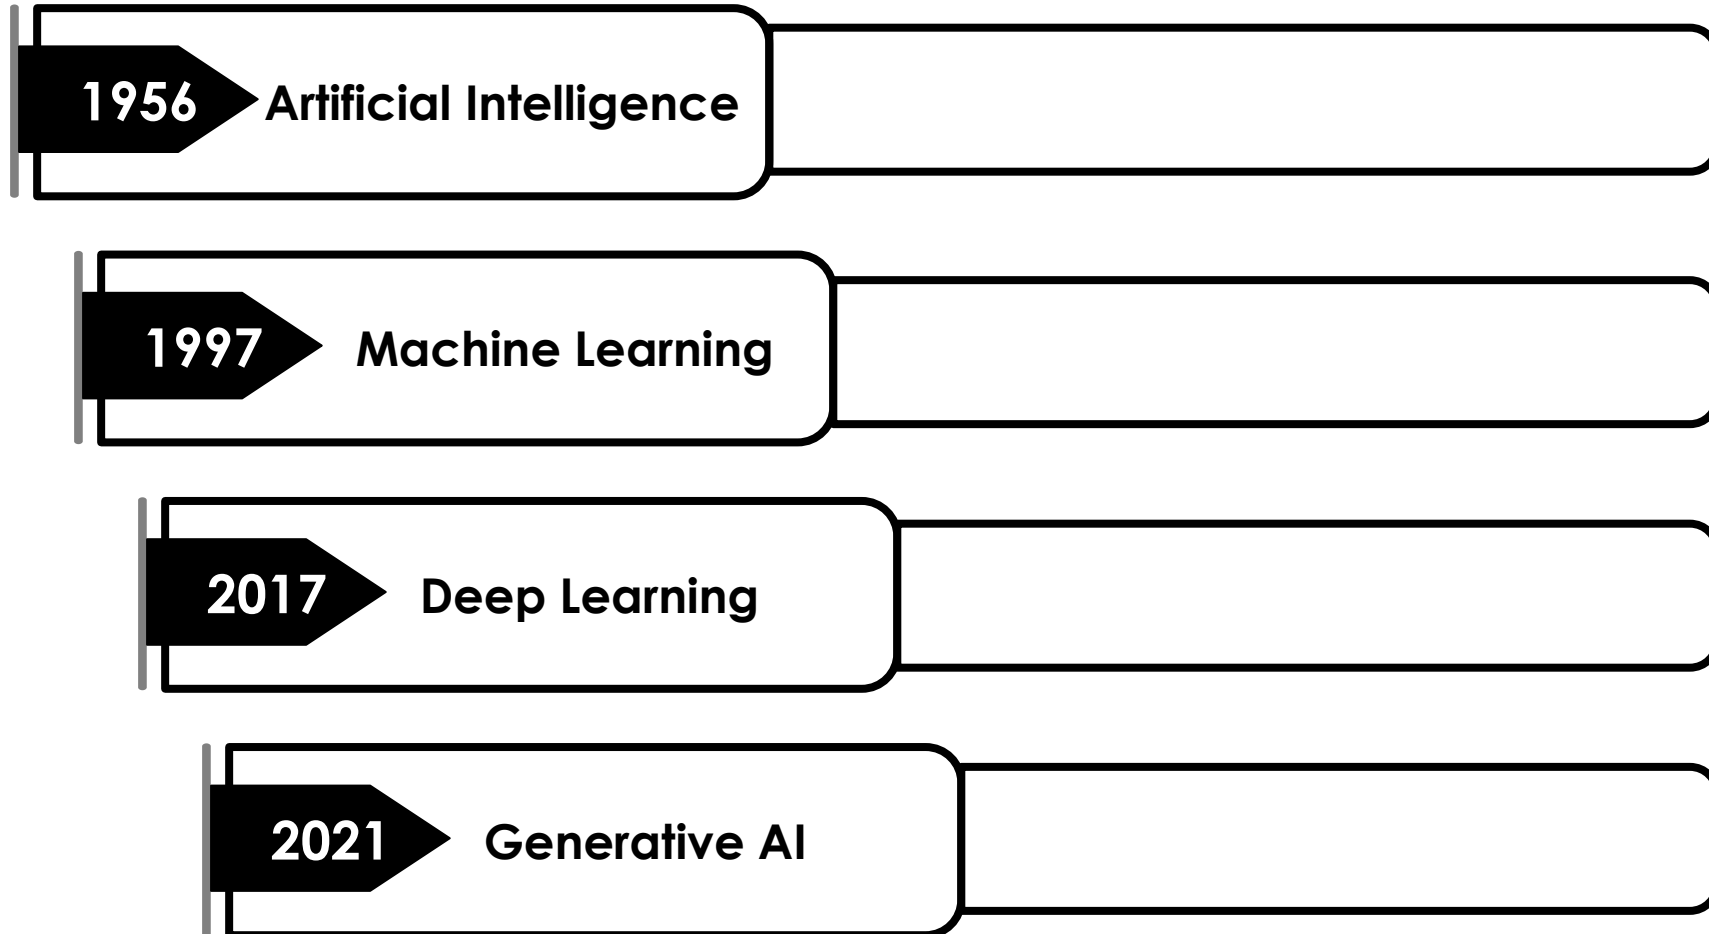

**Fretting About Election-Year  
Deep Fakes, States Roll Out  
New Rules for A.I. Content**

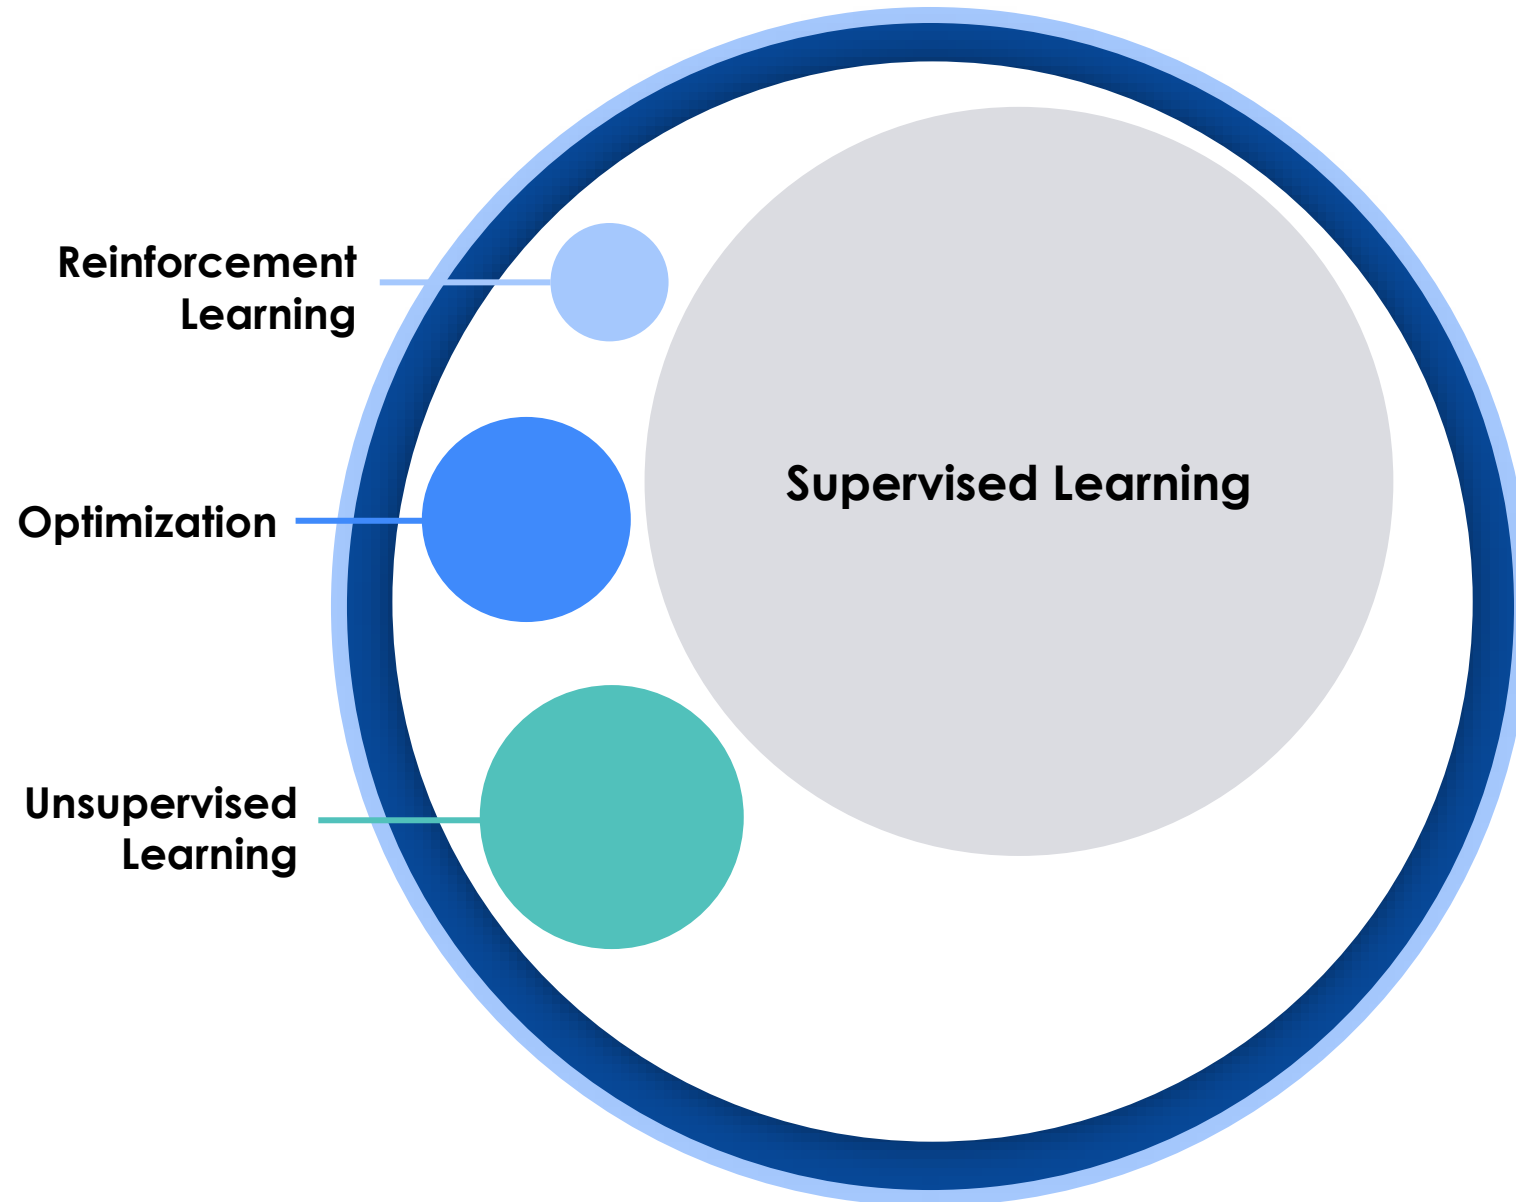

**ChatGPT passes MBA exam given by  
a Wharton professor**

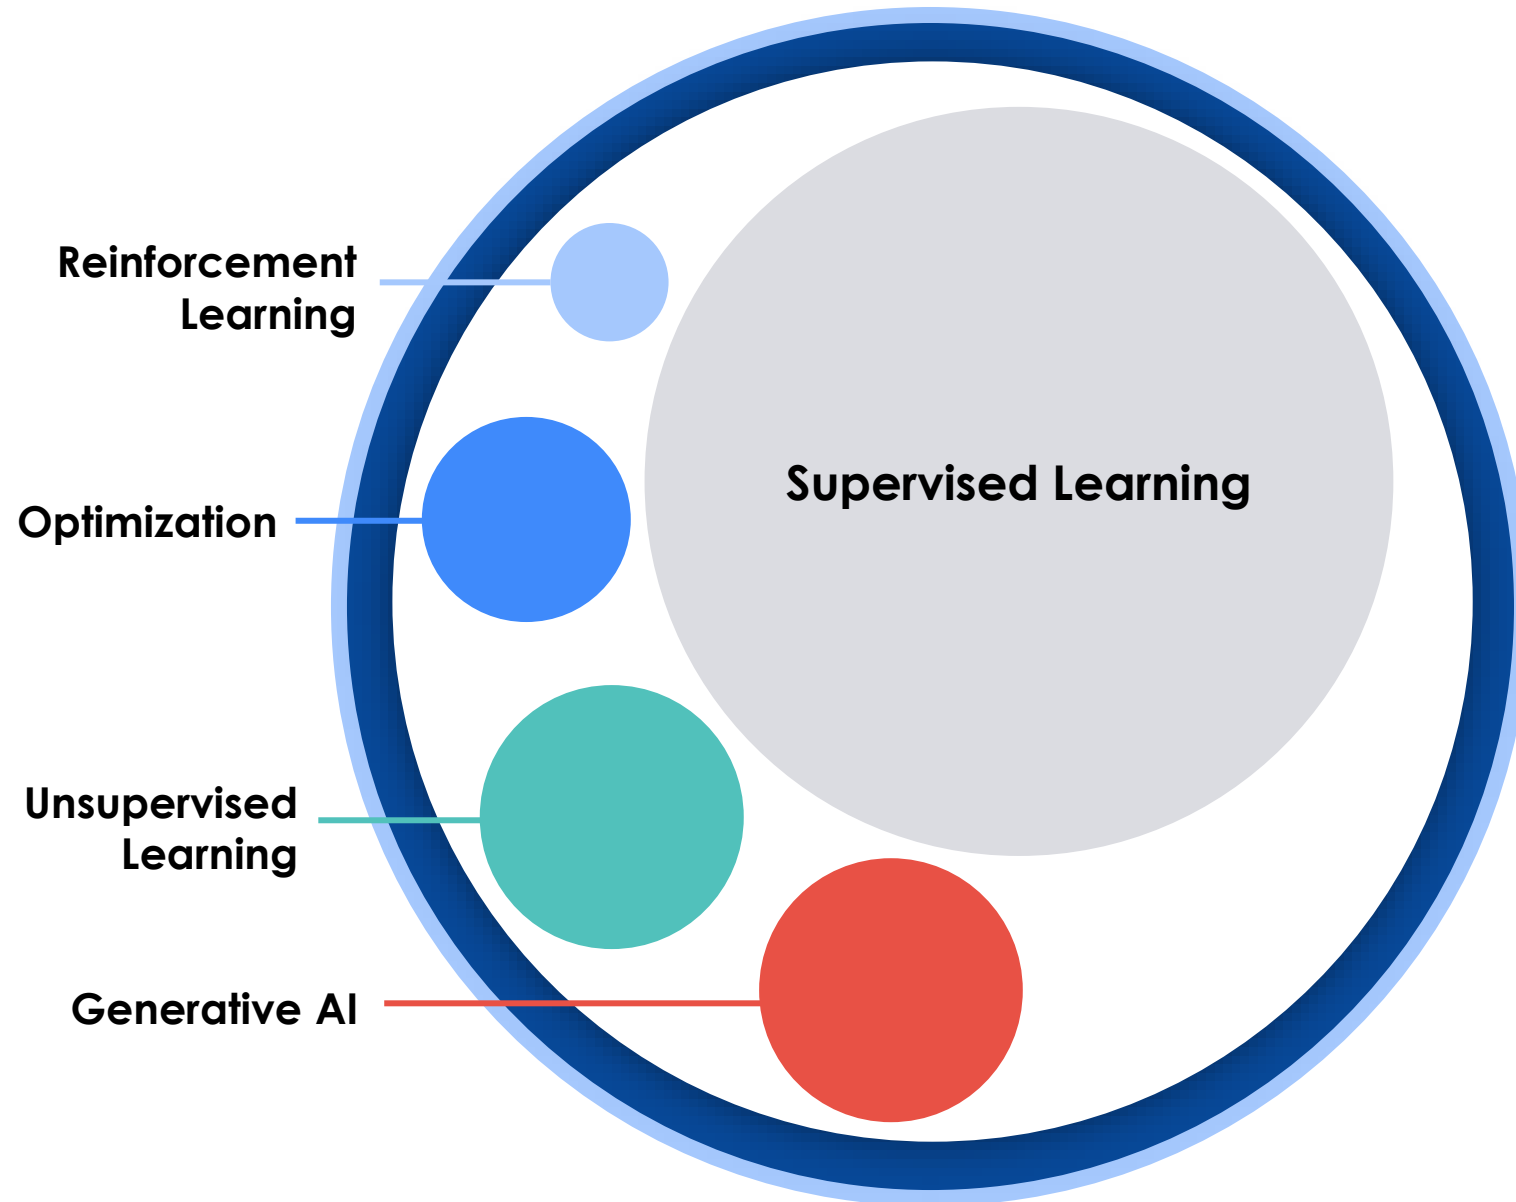

# History

# AI algorithms are our toolkit

# GenAI is the newest tool

# Traditional vs. Generative AI

**Traditional AI is a tool  
for decision making**

Predictive demand  
planning or pricing

Personalizing  
product  
recommendations  
or promotions

Demand  
forecasting

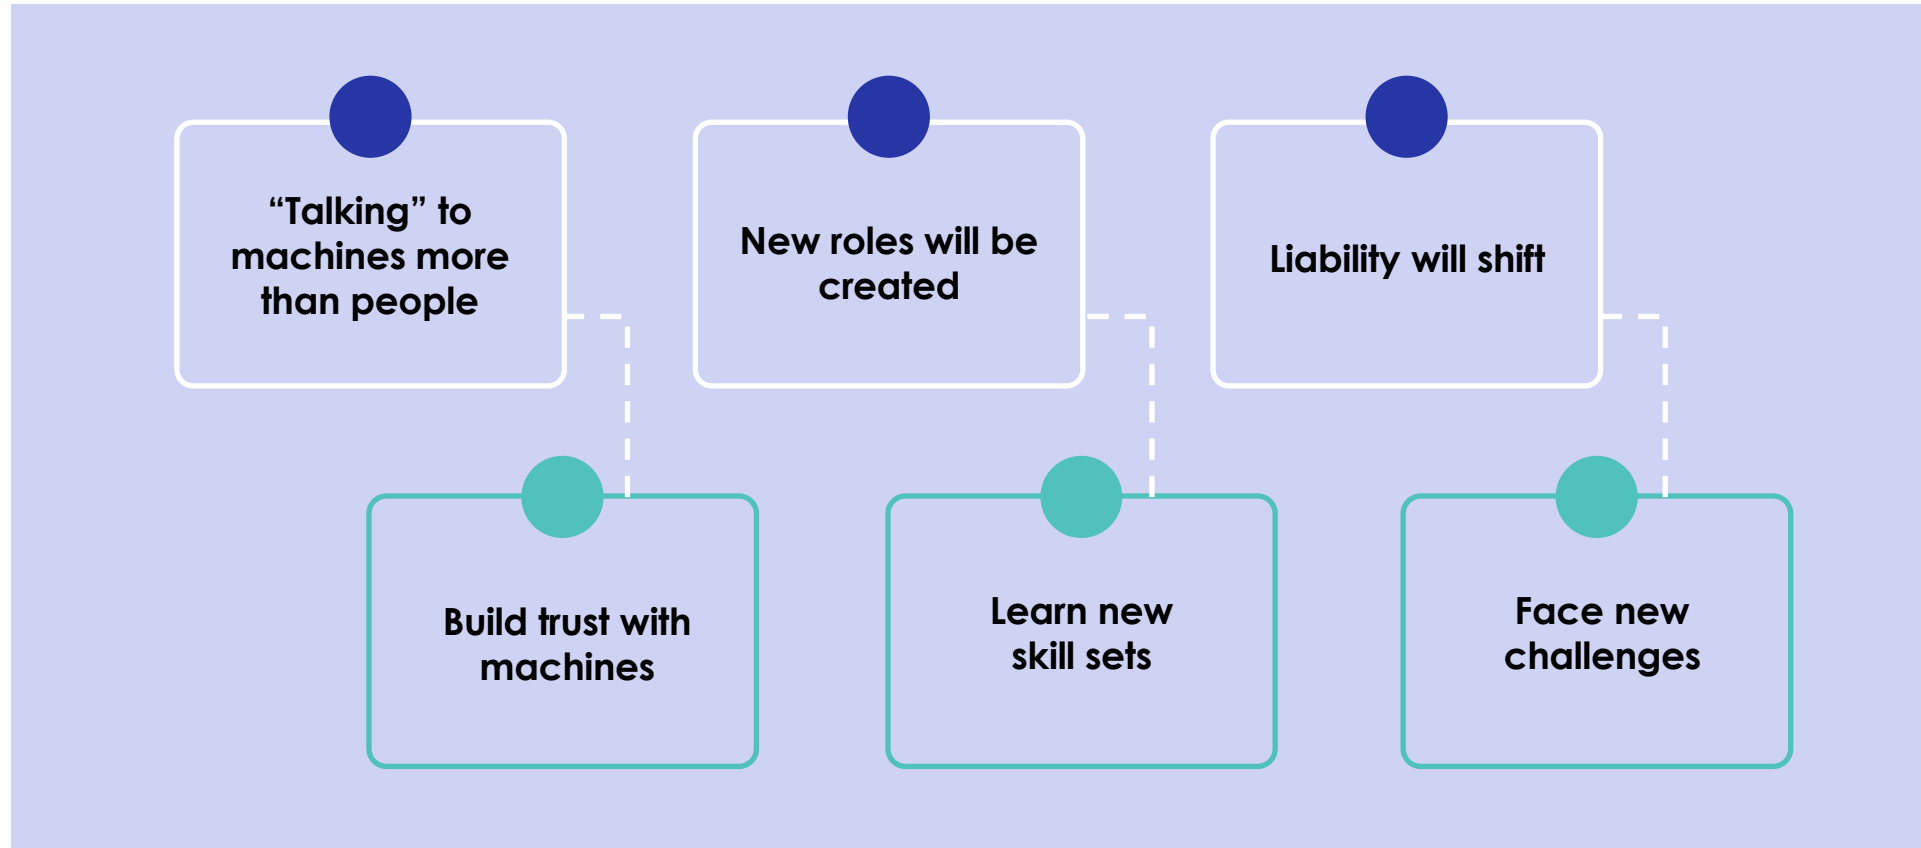

**Generative AI is a worker  
for content generation**

Writing tasks like  
meeting notes

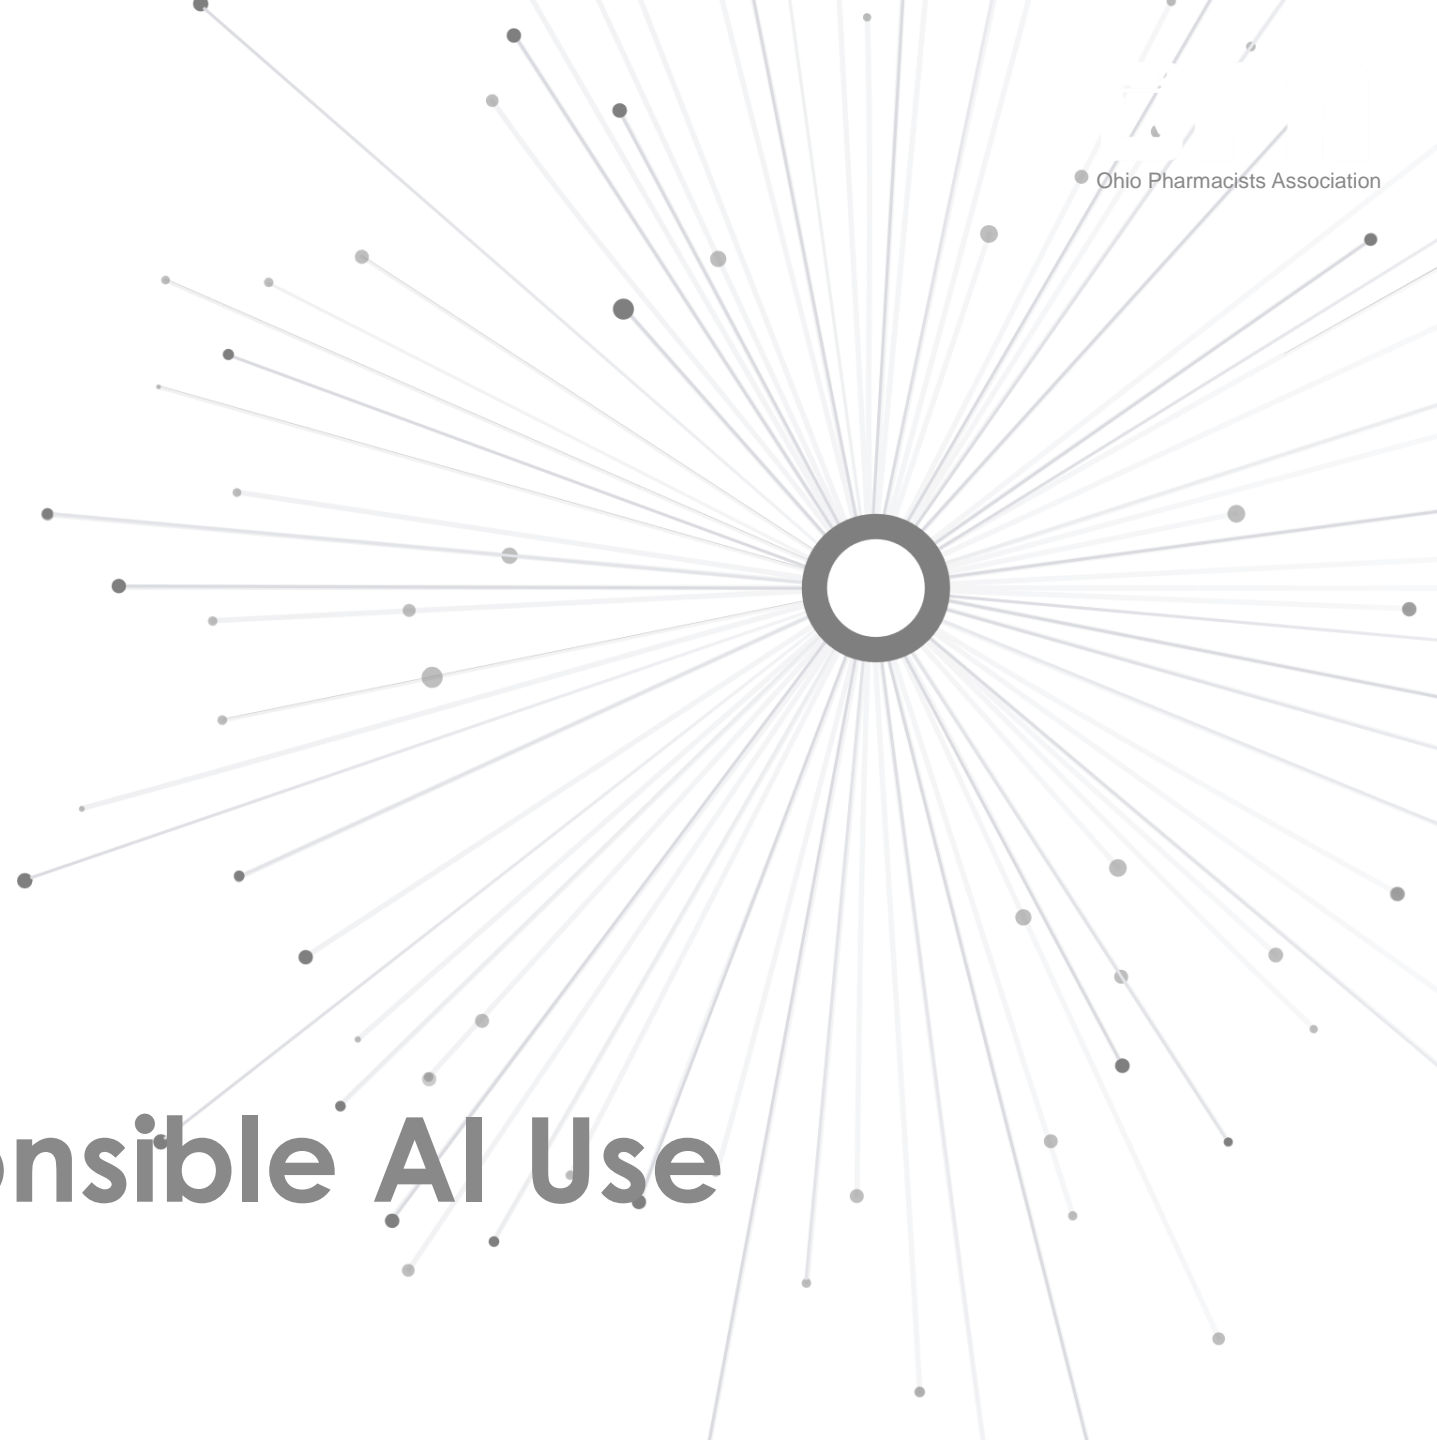

Design drafts

Customer-facing  
chatbots

# AI Drives Change

# Responsible AI Use

Ohio Pharmacists Association

**Experts warn of rise in scammers using AI to mimic voices of loved ones in distress**

**Tom Hanks says dental plan video uses 'AI version of me' without permission**

**Analysis: State AI Legislation Surges by 440% in 2023**

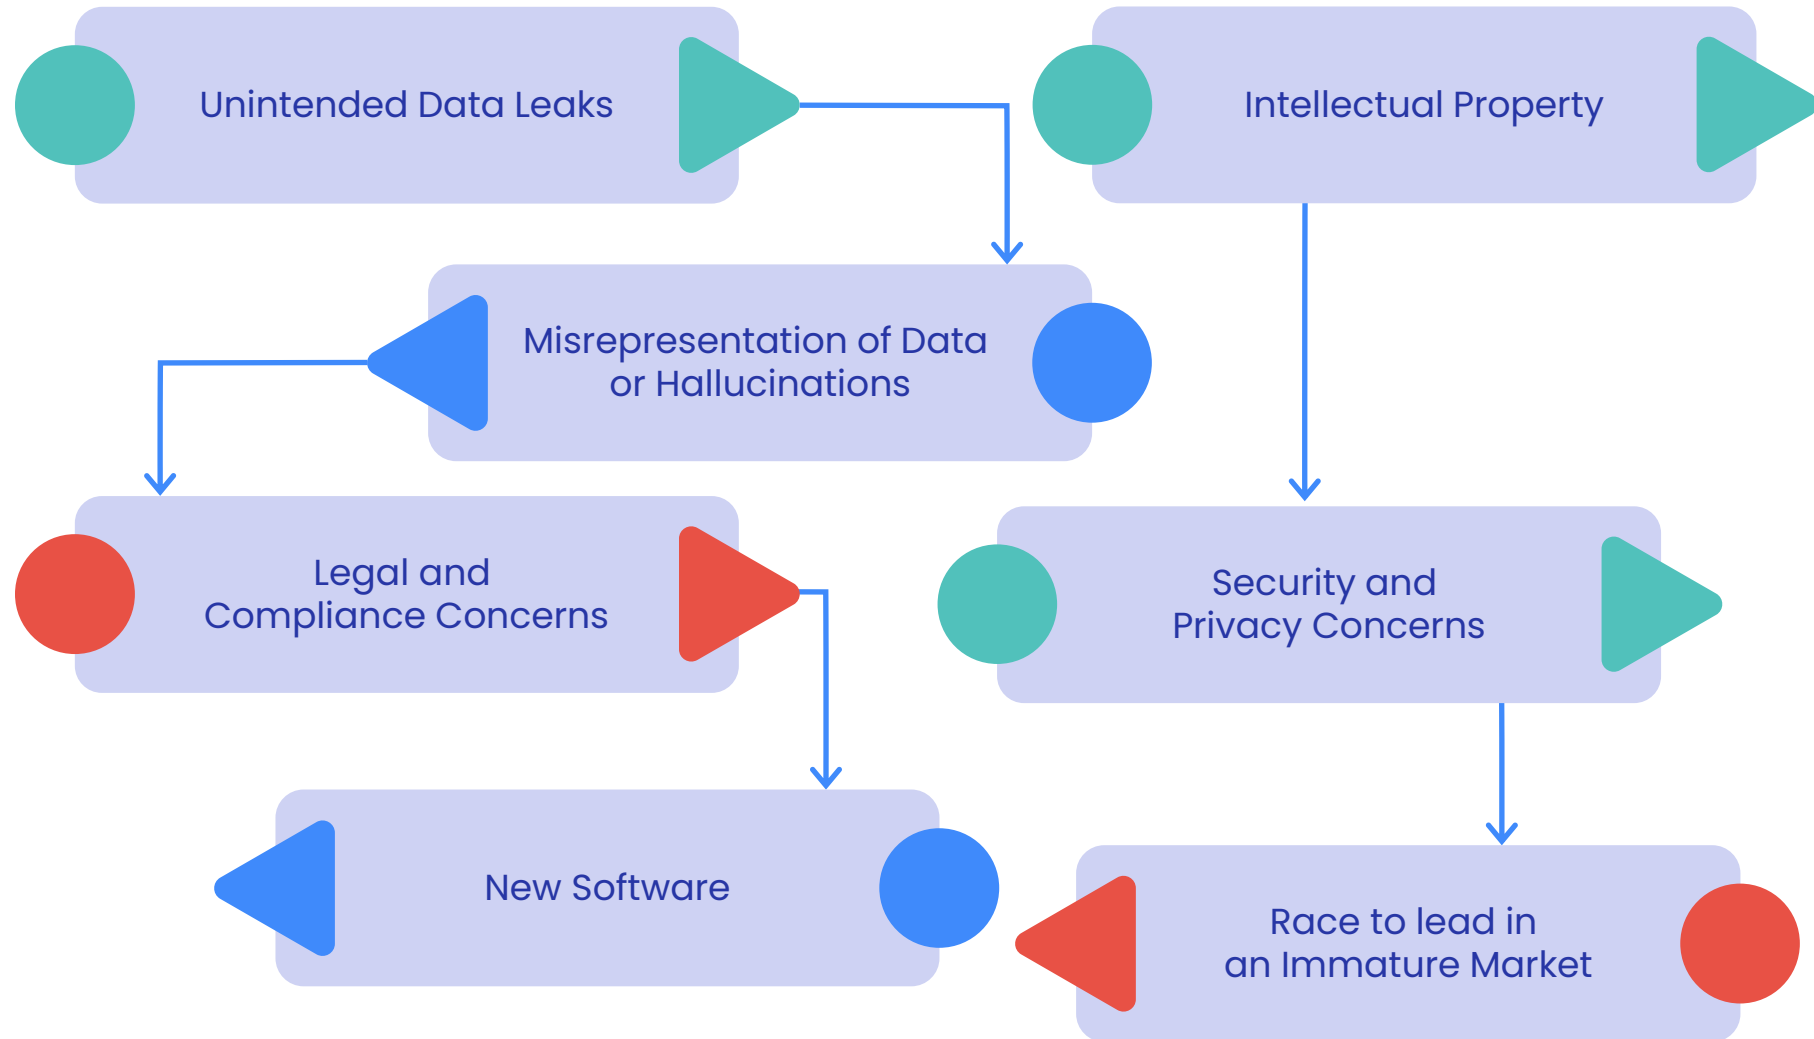

**THE WALL STREET JOURNAL.**

**New York City Passed an AI Hiring Law. So Far, Few Companies Are Following It.**

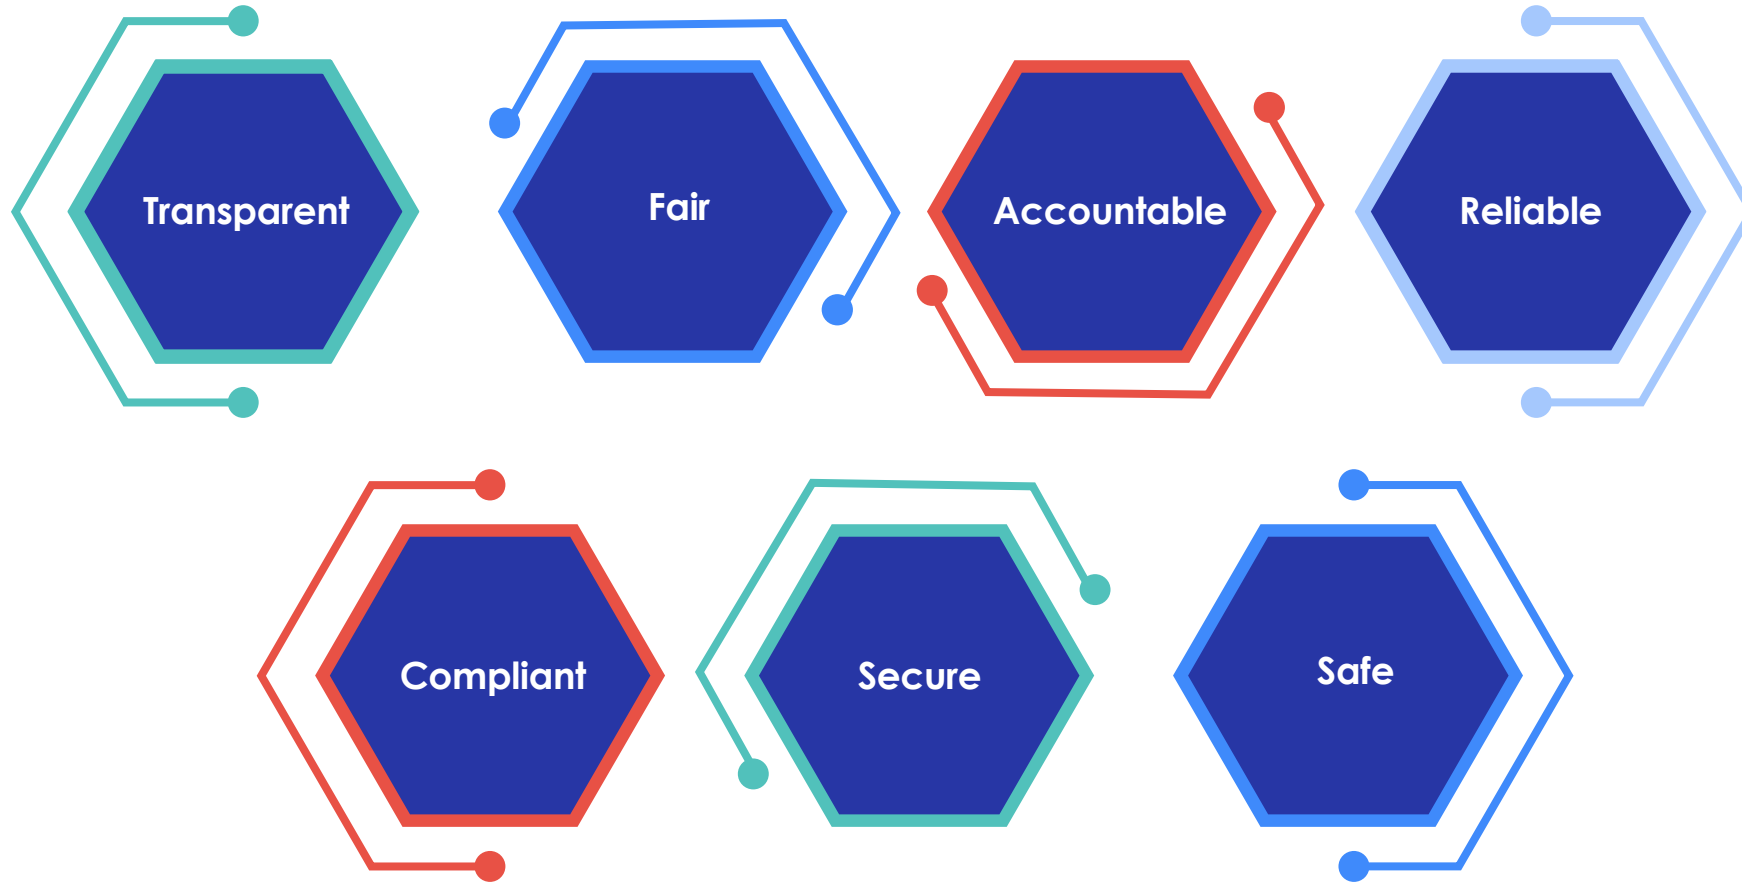

**House leaders launch bipartisan artificial intelligence task force**

# AI Introduces New Risks

# Responsible AI Frameworks

# Barriers to AI implementation in pharmacy practice

# Barriers to AI Implementation

✓ Culture of suspicion or fear

✓ Cost

✓ Technology capabilities

✓ Upskilled talent

✓ Data Infrastructure

# What does AI mean for healthcare?

# AI Use Cases in Pharmacy

**Effectiveness of ChatGPT in clinical pharmacy and the role of artificial intelligence in medication therapy management**

BioMed Research  
International

**Artificial Intelligence-Based Data-Driven Strategy to Accelerate Research, Development, and Clinical Trials of COVID Vaccine**

**Artificial Intelligence Solutions to Increase Medication Adherence**

**AI spots signs of mental health issues in text messages on par with human psychiatrists**

**Generative artificial intelligence can have a role in combating vaccine hesitancy**

# Identifying Opportunities

- ✓What are our priorities or problems?
- ✓What outcomes are we trying to achieve?
- ✓What is the value of solving?
- ✓How do we measure success?

- ✓Could AI provide a prediction or decision?
- ✓Is it ethical, legal, responsible?
- ✓Can we get the data & talent to build and maintain?

# Use Case: Personalizing Customer Outreach

- ✓What are our priorities or problems?
- ✓What outcomes are we trying to achieve?
- ✓What is the value of solving?
- ✓How do we measure success?

- ✓Could AI provide a prediction or decision?
- ✓Is it ethical, legal, responsible?
- ✓Can we get the data & talent to build and maintain?

# Use Case: Chatbot

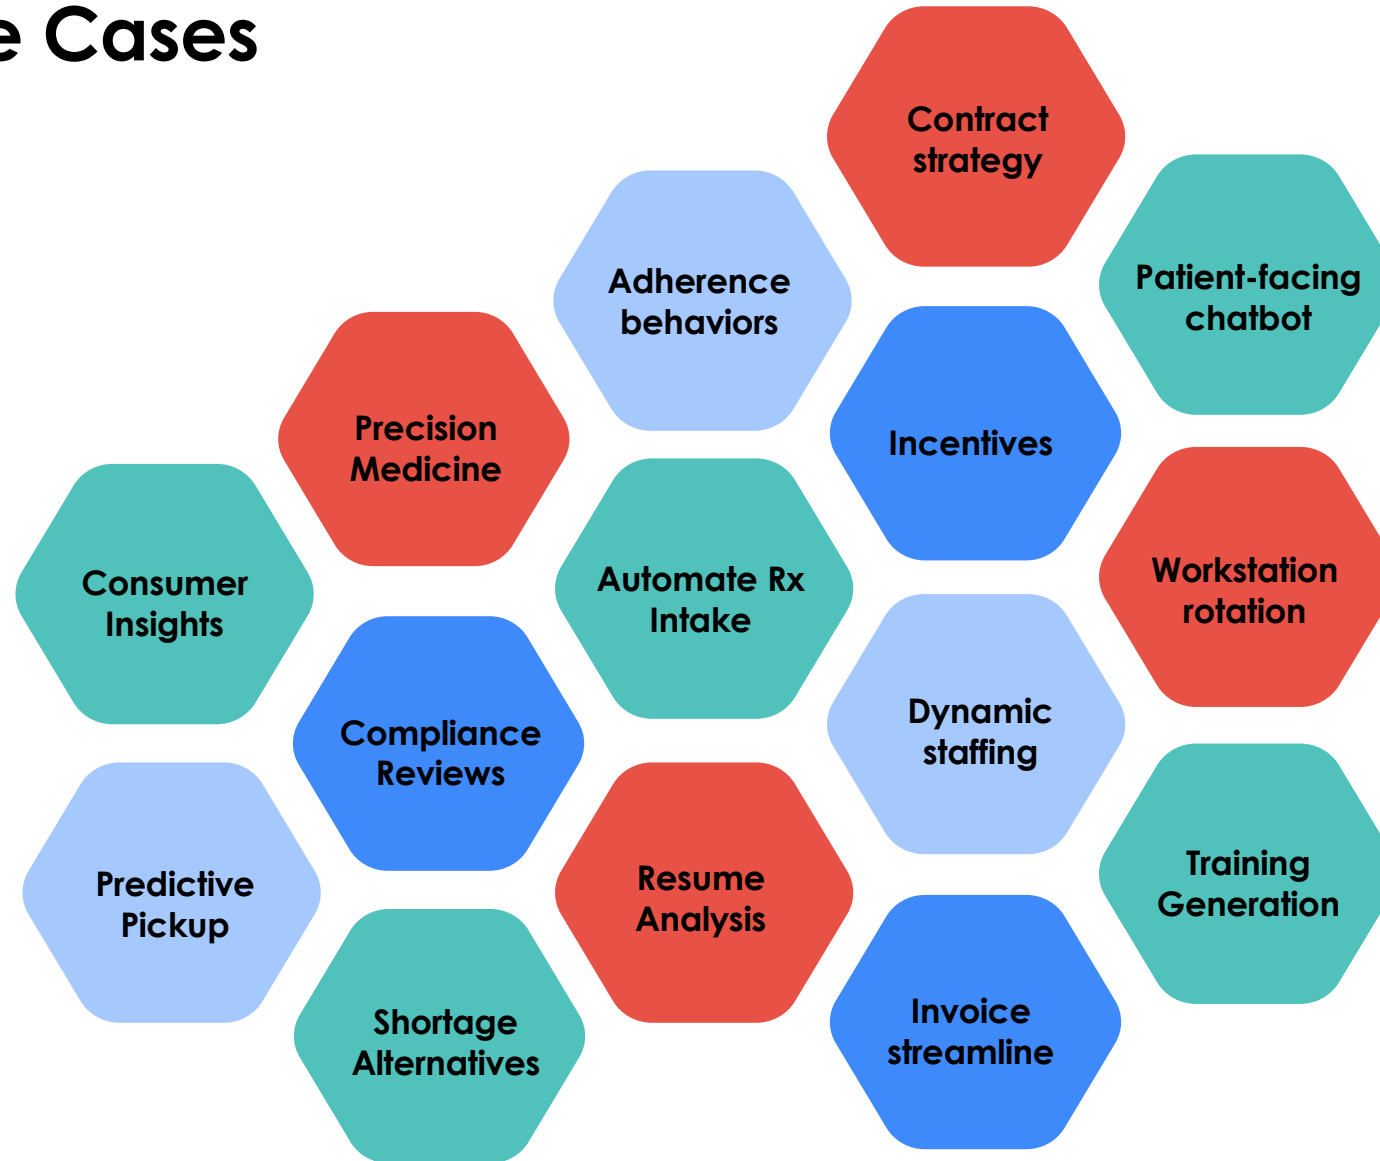

- ✓What are our priorities or problems?
- ✓What outcomes are we trying to achieve?
- ✓What is the value of solving?
- ✓How do we measure success?

- ✓Could AI provide a prediction or decision?
- ✓Is it ethical, legal, responsible?
- ✓Can we get the data & talent to build and maintain?

# Use Cases

AI is a resource  
to **improve** human  
connections, **not**  
replace them.

Researchers have been experimenting with artificial intelligence since the 1950's.

AI is accelerating due to demand for amplification of human power through automation, efficiency, and computing power.

AI Barriers include:

- culture,
- cost,
- skills, and
- data infrastructure.

Innovation in healthcare will give the ability to utilize data to personalize and impact patient care.

Without responsible practice, AI has potential for unintended consequences and may not perform the task as designed.

Identify impact and feasibility to prioritize your use of AI.

Data Science and AI are complex, but foundational knowledge enables everyone to understand its applications and value.
